Job | group and Kayser Filtertech strengthen their market presence!

Kayser Filtertech Spain will continue its market activities within the Job | group as of April 1st, 2018.

This move is part of the Job | group and Kayser Filtertech strategic development.

We are excited to enlarge the market presence as well as our portfolio
under the roof of the FINSA brand.

The business fits perfectly into the existing infrastructure and therefore
we'll be faster and closer to the market.

All our customers in Spain and Portugal will benefit from the local presence along their value chain.

For Kayser Filtertech, a solution provider in dry filtration, and Job | group, a market leading
frontrunner in Hi-Tech textiles it's the next step of their development path.

Both managements are convinced to create a win-win situation. On the one hand for both companies
and on the other hand especially for all customers.

The family owned companies expect major synergies regarding market penetration and business
development.
